

Hazem Ragab

BACKEND SOFTWARE ENGINEER

Suez, Egypt | rhazem13@yahoo.com | linkedin.com/in/rhazem13 | github.com/rhazem13
Portfolio: hazemportfolio-frontend.pages.dev

PROFILE

Backend engineer building production real-time audio services and integrations with Node.js, TypeScript and Redis. Experience across concurrency, performance, reliability and enterprise .NET systems.

PROFESSIONAL EXPERIENCE

Intella | Backend Engineer

Apr 2026 - Present

- Build and debug production real-time audio relay and integration services, including browser WebSockets, Genesys Cloud and Ameyo/SIP integrations.
- Fixed concurrent-session quota accounting that could allow approximately 5x usage over-consumption.
- Reduced recording finalization in a 60-second timeline-gap case from ~18.3 seconds to ~222 ms; moved shared state toward Redis for multi-instance coordination.

Stack: Node.js, TypeScript, Redis, Docker, Kubernetes, Prometheus, Grafana

DP World | Software Engineer

Jun 2025 - Apr 2026

- Developed and maintained enterprise finance, logistics and safety applications using .NET Core, Angular and background Worker Services.
- Resolved production issues and contributed to legacy modernization in internal operational systems.

Freelance | Software Engineer

Mar 2023 - Aug 2025

- Delivered client products across e-commerce, social platforms and logistics, including APIs, payments, authentication, maps and real-time features.

Stack: Flask, .NET, Laravel, React, Flutter, PostgreSQL/PostGIS, Redis

SELECTED ENGINEERING WORK

Memory Mate - Designed Flask APIs; used PostGIS for location queries and Redis caching for frequent reads. (Academic)

Charity Donations - Built role-based Flask/React donation flows and PayPal integration; integrated YOLO-based document validation. (Client)

AskCity - Built Flutter app and PHP admin dashboard; integrated Agora video, Back4App chat and Firebase phone authentication. (Client)

TECHNICAL SKILLS

Backend: Node.js, TypeScript, .NET Core, C#, Python, Flask, REST APIs, WebSockets

Data & infrastructure: Redis, PostgreSQL, PostGIS, SQL Server, Docker, Kubernetes, CI/CD

Observability & systems: Prometheus, Grafana, concurrency, performance debugging, authentication

EDUCATION

B.Sc. Computer Science, Suez University (2023) | First in class | GPA 3.91 / 4.0
